Website Development – Learn HTML, CSS and JavaScript

One of the units you are going to complete in the BTEC IT course is website development. You'll need to learn programming skills in HTML, CSS and JavaScript.

You can learn the skills you need by signing up for free courses through the Codecademy or the Mimo websites. Mimo offers a mobile app version, so you can learn coding on the go! Get ahead by completing the HTML, CSS and JavaScript modules by following the Codecademy or Mimo courses.
